

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

beside each other for study. A key to all abbreviations used is very essential, not only for the observer himself, but especially for those who may in future years have access to his records. A convenient place to put this key is on the inside of the front cover. After enough sheets are completed an index should be made and all laced into one volume.

GENERAL NOTES.

Occurrence of the Arctic Tern (*Sterna paradisæa*) in the Hawaiian Islands.—A weary and wayworn individual of this species was discovered on the beach at Hilo, Island of Hawaii, May 9, 1891. The bird boarded a schooner when four days off port, being evidently much exhausted, but disappeared three days afterwards, having evidently sighted land. It was next seen on the beach by some boys, but was hardly able to fly, and was captured by hand after a short chase. It came into the possession of Mr. R. T. Guarde, but died the next day from hunger and exhaustion. Mr. Guarde had the bird mounted, and very generously presented it to the writer. The bird was assuming the full nuptial dress, and presumably was on its way to Alaskan breeding grounds when it was lost or blown to sea. After a brave struggle with fate it reached distant Hawaii only to fall a victim to the consequences of its protracted flight.

So far as the writer is aware this is the first American tern to be reported from the Hawaiian Islands, though American gulls are not of very rare occurrence. — H. W. HENSHAW, *Hilo, Hawaii*.

Note on the Name of Audubon's Shearwater.—Lesson in the 'Revue Zoologique' for April, 1839, p. 102, describes a shearwater as follows: "*Puffinus* [sic] *Lherminieri*, Less.—Corpore supra nigro, infra albo, rostro et pedibus nigro. — Long. ; 12 poll. — Hab. ad ripas Antillarum." Finsch, in the P. Z. S. 1872, p. 111, renames this species *Puffinus auduboni*, being led astray by believing Bonaparte's citation of Lesson's name referred to the 'Traité,' in which work it is not to be found. In view of the above facts this species should stand in the Check-List as *Puffinus lherminieri* Lesson — J. H. RILEY, *U. S. National Museum, Washington, D. C.*

European Widgeon (*Mareca penelope*) on Long Island, N. Y.—It gives me great pleasure to record the capture of an unusually fine adult male English Widgeon at Bostwicks Pond, Gardiners Island, Suffolk County,

N. Y., on Wednesday, November 27, 1901. This duck, which was brought to me for identification, was killed by my friend, Mr. Thomas Newbold Rhinelander, while shooting over decoys from an island in Bostwicks Pond. The bird was entirely alone, rather wild and a little shy of the decoys.

On Saturday night and all of Sunday preceding there had been a heavy northeast storm followed on Monday and Tuesday by high northwest wind with clearing weather, and on Wednesday (the day the duck was shot) very high northwest wind, freezing hard. There was an unusually large flight of American Widgeon (*Mareca americana*) during the two days immediately following the storm, many flocks numbering over one hundred birds. A number of American Widgeon were killed. An old resident of Gardiners Island informed Mr. Rhinelander that every year the Widgeon came to the Pond in large numbers but usually later in the winter. The other ducks noted in great numbers were Black Duck (*Anas obscura*) and Red-breasted Merganser (*Merganser serrator*). A great many Black Ducks were also killed. — NEWBOLD T. LAWRENCE, *New York City*.

The Masked Duck in Vermont. — Since the publication of my 'Review of Prof. Perkins's Vermont Birds,' Mr. Samuel Henshaw has called my attention to the fact that the specimen of *Nomonyx dominicus* (No. 482) in the collection of the Boston Society of Natural History has its right wing clipped, and was thus probably not a wild straggler in Vermont, but an escaped tame bird. This evidence is, I think, enough to expunge this record, which has held a place in North American faunal literature since 1858. — REGINALD HEBER HOWE, JR., *Longwood, Mass.*

Rare Ducks in Massachusetts. — While looking over recently an interesting local collection of birds, belonging to Mr. Arthur C. Dyke of Bridgewater, Mass., consisting of birds taken within the limits of that town, I came across two very rare species of ducks for this locality.

Chaulelasmus streperus. GADWALL. — There were two well-marked specimens of this species, in immature plumage, both of which were taken by Mr. Harry Sturtevant, on Oct. 18, 1901, at Nippenicket Pond in Bridgewater. They came in to live decoys at a gunning stand on this pond, controlled by Mr. Joseph E. Bassett and Mr. Sturtevant. The Gadwall is a very rare or accidental visitor in this State. So far as I know there is only one other record.

Somateria spectabilis. KING EIDER. — A young male of this species, in Mr. Dyke's collection, was taken by Mr. Joseph E. Bassett at his gunning stand, at Nippenicket Pond, on Oct. 21, 1899. The King Eider is taken occasionally on our coast where it occurs as a rare winter visitor, but has, I believe, never been taken in an inland pond. — A. C. BENT, *Taunton, Mass.*
